Subject: Fact sheet on state enforcement action in Bakersfield

Hi David,

On today's Senior Staff call Jared Blumenfeld mentioned a California state enforcement action (or actions) that are being carried out related to oil and gas development in the Bakersfield area, and that this effort is related to state primacy over the UIC program, aquifer exemptions, and potentially hydraulic fracturing. Could you please coordinate with the right people in R9 (and OGWDW, as appropriate) to put together a 1 or 2 pager for Lisa Feldt that describes the effort and its relationship to these issues and send it to Mary and myself by Wednesday COB?

Thank you very much,

Martha
